

**PACIFIC EDGE**  
CANCER DIAGNOSTICS COMPANY

# SUMMER INTERNSHIPS

Dunedin-Based Biotech Opportunities, 2022-2023

## Join Our World Class Team

Pacific Edge specialise in the discovery and commercialisation of diagnostic and prognostic tests for the detection and management of cancer. Our expertise extends from discovery to market, and includes cancer genetics, bioinformatics, clinical pathology, molecular oncology, technology development, and marketing.

**This summer we're looking for interns to support us on several key projects.**

## Projects Available

Our research-based project offerings focus on product improvement and new product development using DNA, RNA, and cell based diagnostic technologies.

Clinical and IT-related project opportunities are also being considered.

## Next Steps

- Projects will be finalised by late August/ early September. Keep an eye out on our website, or contact us for more information via [recruitment@pelnz.com](mailto:recruitment@pelnz.com).
- Applications will officially open in September.
- Successful applicants will be appointed by mid-October, with work commencing at our Dunedin offices and lab in the Centre for Innovation on Campus November/ December 2022. You'll be expected to work for 10 weeks or 400 hrs, whichever comes first.

## Why Join Us

- Work for a recognised industry leader that's changing lives around the world.
- Get a unique opportunity to collaborate with, and learn from, experts working at the forefront of their field.
- Gain invaluable commercial experience and professional exposure. Launch your career!
